INTERVENTURE

FEATURES AND BENEFITS

- Access readily data on the state of the field of quantum and deep tech.
- Obtain the critical information to orient your R&D or to prioritize your industrial initiatives.
- Combine innovation forces for greater impact.
- Conduct crowdsourcing of your needs to experts in quantum and deep tech.
- Find partners with business skills to outsource commercial development of products.
- Find partners with technical and scientific skills to outsource R&D projects.
- Access state-of-the-art laboratories.
- Seize new revenue opportunities.
- Reduce risks in the conduct of complex R&D projects.
- Generate synergistic connections by means of sharing concerns on technological developments.
- Identify talent for your research group or your company.

WHO ARE WE?

INTERVENTURE is a platform that supports the community of individuals and organizations keen on learning more about technological developments and trends in quantum and deep tech - and more specifically, those that are seeking to identify partners for R&D and/or business activities.

INTERVENTURE is about empowering matchmaking between technology users on the demand side - i.e., principally, SMEs, midsize firms and large corporations, as well as venture investors and service providers - and technology producers on the supply side - i.e., principally research scientists in universities and public research centers, but also entrepreneurs in start-ups, and sometimes research scientists in corporations. Our objective is to generate greater convergence and closer proximity between the needs on the Market Pull side and the offerings on the Technology Push side in quantum and deep tech.

HOW CAN INTERVENTURE SERVE YOUR NEEDS

MISSION : INTERVENTURE is a platform that supports the community of individuals and organizations keen on learning more about technological developments and trends in quantum and deep tech - and more specifically, those that are seeking to identify partners for R&D and/or business activities.

PURPOSE : INTERVENTURE is about empowering matchmaking between technology users on the demand side - i.e., principally, SMEs, midsize firms and large corporations, as well as venture investors and service providers - and technology producers on the supply side - i.e., principally research scientists in universities and public research centers, but also entrepreneurs in start-ups, and sometimes research scientists in corporations. Our objective is to generate greater convergence and closer proximity between the needs on the Market Pull side and the offerings on the Technology Push side in quantum and deep tech.

BENEFITS : Technological developments result increasingly from aggregating and utilizing knowledge that is already available - and not just on acquiring new knowledge. In other words, creating value comes more and more from the aggregation of technological assets, from sharing expertise as well as from accessing state-of-the-art research infrastructure for collaborative work. The practical benefits of working on INTERVENTURE's platform include:

- Accessing readily data on the state of the field of quantum and deep tech.
- Obtaining the critical information to orient your R&D or to prioritize your industrial initiatives.
- Capturing network effects to support combinatorial innovation as a result of generating a greater number, and of increasing the utility, of complements (as defined by complementary in technological and economic assets that can be shared and assembled to create new products and services that have additional functionality – e.g., IP, technological developments, innovative ideas, know-how, knowledge of market application).
- Conducting crowdsourcing of your needs to experts in quantum and deep tech.
- Finding partners with business skills to outsource commercial development of products.
- Finding partners with technical and scientific skills to outsource R&D projects.
- Accessing state-of-the-art laboratories.
- Seizing new revenue opportunities.
- Reducing risks in the conduct of complex R&D projects.
- Generating synergistic connections by means of sharing concerns on technological developments.
- Identifying talent for your research group or your company.

This could also be a video with graphics to explain the concept of platform and how it applies to CITS

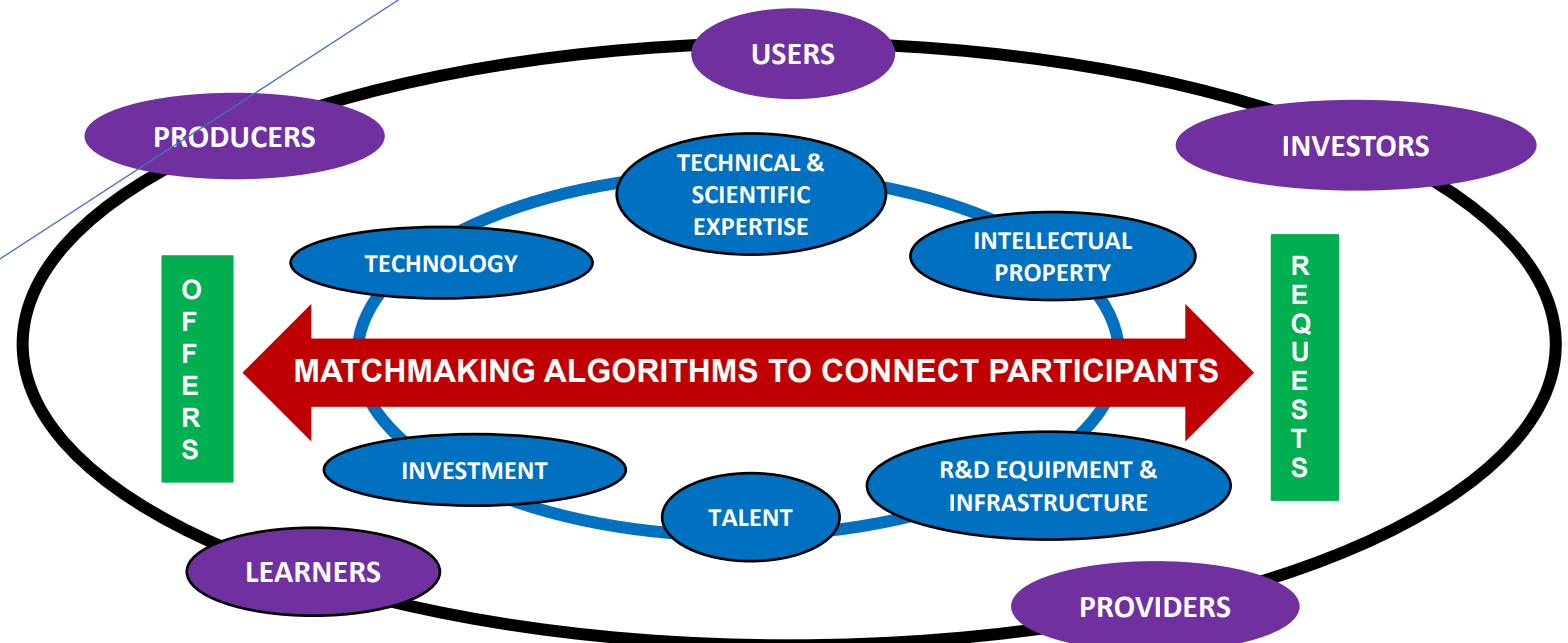

PLATFORM PRIMER : HOW DOES IT WORK

In the schematic illustration of INTERVENTURE's platform components below, the terms are borrowed from Geoffrey G. Parker, Marshall W. Van Alstyne & Sangheet Paul Choudary as defined in *Platform Revolution* (2014). The exchange of knowledge, information and data on technological developments and trends that targets commercial applications in quantum and deep tech defines the **Core Interaction** of INTERVENTURE's innovation brokerage platform.

PARTICIPANTS: The platform dynamics are principally about connecting **Producers** (e.g., inventors, research scientists) and **Users** (e.g., corporations) of technology, but **Participants** can also include **Investors** and **Providers** (of professional services) keen on participating in technological developments, as well as just **Learners**. **Participants** are seeking to exchange specific data and information points with a view to finding common technological or business development interests.

VALUE UNITS: The knowledge, information and data that can be exchanged by, and that has value for **Participants** on the platform are categorized under the following : *Technology, Technical & Scientific, or Business Expertise, Intellectual Property, R&D Equipment & infrastructure, Investment and Talent* – all such categories relating to quantum and deep tech. Those are the **Value Units** for which **Participants** on the platform formulate specific **Offers** or **Requests**.

FILTER: The search tools to process the **Offers** or **Requests** submitted by, and seek connections and matches between, **Participants** constitute the platform's **Filter** as driven by algorithms based on XXXXX and deep learning technologies (e.g., Natural Language Processing, XXXX ZZZZ).

START NOW -- Describe your *Offer or Request*

In the OFFER mode, you are reaching out to the community with knowledge, information and data describing your tangible and/or intangible assets, and this is because you are willing to bring such assets to the table to establish a partnership for R&D developments and/or for business activities

In the REQUEST mode, you are reaching out to the community to scout for knowledge, information and data of a tangible or intangible nature, and this is because you are trying to identify complementary assets to establish a partnership that would advance your R&D and/or business activities

Knowledge, information and data described in an **OFFER** or a **REQUEST** pertain to one, or a number, of the following:

- **Technology** (as developed within your R&D projects, or sought to strengthen your products or services) **TICK**
- **Technical & Scientific, or Business, Expertise** (as the practical and theoretical competence of individuals and/or organizations)
- **Intellectual Property** (as derived from R&D projects and consigned in patents or as know-how) **TICK**
- **R&D Equipment & Infrastructure** (namely, the facilities available and operational in public and private laboratories) **TICK**
- **Talent** (namely, the human resources) **TICK**
- **Investment** (namely, capital) **TICK**

HOW DO I JOIN?

- **PRODUCERS** : if you are looking to spin off, license or partner on, the commercial development of your research ideas or high-quality intangible technology assets or discoveries **TICK**
- **USERS** : if you are looking for specific technological solutions or technology transfer opportunities, or if you are searching for partners to drive R&D activities inside or outside your organization on a technology to complete the development of one of your products or services **TICK**
- **INVESTORS** : if you are looking for investment opportunities in technology, or if you are searching for M&A investment opportunities for your clients **TICK**
- **PROVIDERS** : if you are looking to market your professional services **TICK**
- **LEARNERS** : if you are looking to learn more about, and educate yourself on, quantum and deep tech **TICK**

GET INVOLVED NOW -- Describe your *Offer* or *Request*

In the OFFER mode, you are reaching out to the community with knowledge, information and data describing your tangible and/or intangible assets, and this is because you are willing to bring such assets to the table to establish a partnership for R&D developments and/or for business activities

In the REQUEST mode, you are reaching out to the community to scout for knowledge, information and data of a tangible or intangible nature, and this is because you are trying to identify complementary assets to establish a partnership that would advance your R&D and/or business activities

Knowledge, information and data described in an **OFFER** or a **REQUEST** pertain to one, or a number, of the following:

- **Technology** (as developed within your R&D projects, or sought to strengthen your products or services) **TICK**
- **Technical & Scientific, or Business, Expertise** (as the practical and theoretical competence of individuals and/or organizations)
- **Intellectual Property** (as derived from R&D projects and consigned in patents or as know-how) **TICK**
- **R&D Equipment & Infrastructure** (namely, the facilities available and operational in public and private laboratories) **TICK**
- **Talent** (namely, the human resources) **TICK**
- **Investment** (namely, capital) **TICK**

Technology

OFFER

- Describe the nature of the technology
- Specify its competitive advantages
- At which TRL stage of development is the technology ? **TICK (on TRL below)**
- What potential commercial applications do you have in mind for the technology ?

REQUEST

- Describe the nature of the technological problem that you are trying to solve
- At which TRL stage of development are you willing to consider a technology that could provide a solution to your problem ?
- What potential commercial applications do you have in mind for the technology ?

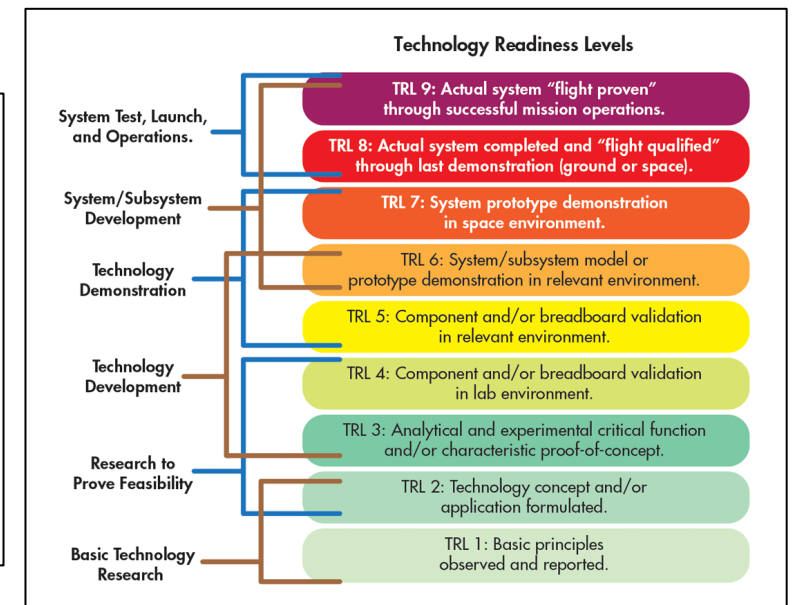

TRLs - as developed by NASA in the 1970s

The *Technology Readiness Level* (TRL) scale is a measure used to assess the maturity of evolving technologies (devices, materials, components, software, work processes, etc.) during development and in some cases, during early operations.

Generally speaking, when a new technology is first invented or conceptualized, it is not suitable for immediate application. Instead, new technologies are usually subjected to experimentation, refinement, and increasingly realistic testing.

Once the technology is sufficiently proven, it can be incorporated into a system or subsystem
TRLs allow engineers to have a consistent datum of reference for understanding technology evolution, regardless of their technical background.

The use of TRLs enables consistent, uniform discussions of technical maturity across different types of technology
TRLs are based on a scale from 1 to 9 with 9 being the most mature technology.

**Technical &
Scientific, or
Business Expertise**

OFFER

- Describe the facets of your technical & scientific or business expertise as well as that of your group
- To which science or engineering field(s) is your technical & scientific or business expertise of relevance ?
- To which commercial market(s) is your technical & scientific or business expertise of relevance ?

REQUEST

- Describe the type of technical & scientific or business expertise that you are looking for
- Which technical & scientific or business problem(s) are you trying to solve ?
- In which science or engineering field(s) is the technical & scientific or business expertise that you are looking for of relevance ?
- In which commercial market(s) is the technical & scientific or business expertise that you are looking for of relevance ?

**R&D
Equipment &
Infrastructure**

OFFER

- List the experimental equipment of your laboratory and describe your laboratory's infrastructure
- For what measures can such equipment be used ?

REQUEST

- Identify the experimental equipment or laboratory infrastructure that you are looking for
- What measures are you hoping to produce with such experimental equipment and laboratory infrastructure ?

Intellectual
Property

OFFER

- List the titles of your (awarded) patents
- Enter the awarded patents in the PATENT FORM **TICK**

REQUEST

- Describe the technical and commercial fields of applications of the patents that you are looking for
- Explain what IP complements that you are chasing for your own technological projects

Investment

OFFER

- What type of investment do you make (e.g., pre-seed, seed, Series A-B-C, Scale-up for manufacturing, Commercialisation ?
- What size of capital are you willing to commit to a project ?
- What are your investment objectives ?

REQUEST

- What type of investment do you make (e.g., pre-seed, seed, Series A-B-C, Scale-up for manufacturing, Commercialisation
- What size of capital are you looking for to complete your project ?
- What are your business development objectives ?

Talent

OFFER

- Describe your fields of technical, scientific or business expertise
- Describe your skills
- What are your career objectives ?
- Please fill the CV FORM **TICK**

REQUEST

- Describe the fields of technical, scientific or business expertise that you are looking for
- Describe the skills that you are looking for
- Please fill the JOB OFFER FORM **TICK**
